Endpoint Security, EDR / XDR & Data Protection • McAfee / Trellix Product Specialist • 14+ Years in IT & Information Security

CAREER FOCUS Senior Security Consultant / Professional Services Lead — enterprise endpoint security, EDR/XDR and data protection delivery for large customer estates.

PROFESSIONAL SUMMARY

Professional Services Consultant with 14+ years in IT and information security, delivering enterprise endpoint security, EDR/XDR and data protection to customers across banking, financial services and corporate environments.

Currently with Trellix (formerly McAfee Enterprise), consulting on product implementation, migration and upgrade, risk and product assessment, environment review and product health assessment, with findings and recommendations presented to customer stakeholders.

Project lead on multiple enterprise security implementations across the McAfee, Trellix, Trend Micro and Sophos portfolios. Owns the full engagement lifecycle: scope of work and project planning, HLD/LLD design, implementation and third-party integration, proof of concept, as-built and SOP documentation, operational handover and onsite team enablement.

INDUSTRIES SERVED Banking • Financial Services • Corporate & Enterprise • Security Services Providers • Security Product OEM

ENGAGEMENT SCALE 10+ named enterprise security implementations delivered • 50+ customer organisations supported • 100,000+ endpoints under management • ePO / database migrations and version upgrades led

CORE EXPERTISE

McAfee / Trellix ePO • Endpoint Security (ENS) • Adaptive Threat Protection (ATP) • EDR / XDR • DLP • Endpoint & Drive Encryption • Application Control • Change Control • Integrity Monitoring • MOVE AntiVirus • Sandboxing • Threat Intelligence

Other Vendors Trend Micro (Anti-APT, Deep Security Manager, TippingPoint IPS) • Sophos Intercept X Advanced with EDR • IBM • Microsoft • VMware

Consulting & Delivery Scope of Work & Project Planning • HLD / LLD Design • Implementation & Third-Party Integration • Migration & Upgrade • Proof of Concept • Dashboard, Alert & Report Configuration • As-Built & SOP Handover • Onsite Team Enablement

Assessment & Advisory Risk Management • Product Assessment • Environment Review • Product Health Assessment • Findings & Recommendations Readout

Infrastructure & Cloud Windows Server 2008 / 2012 • AD DS, LDAP, DNS, DHCP, GPO, FSMO, RODC, WDS • Hyper-V • VMware vSphere ESXi • AWS • GCP • Azure

Agentic AI Coding Tools: Claude Code, VS Code, Cursor, GitHub Co-pilot, and Codex — leveraging AI-assisted agentic workflows for cybersecurity scripting, automation, code generation, analysis,.

PROFESSIONAL EXPERIENCE

Professional Services Consultant

Dec 2020 – Present

Trellix (formerly McAfee Enterprise) — India (Remote)

Deliver consulting engagements across the McAfee / Trellix endpoint and detection stack for enterprise customers, covering design, implementation, migration, assessment and enablement. Joined McAfee in December 2020 and continued through the transition to Trellix.

- Consult on planning, design and implementation of endpoint security, EDR/XDR and data protection products across enterprise customer environments.
- Deliver ePO, supporting database and endpoint agent migration and version upgrade engagements end to end.
- Perform risk management, product assessment and environment review, identifying configuration and coverage gaps.
- Run product health assessments and read out findings and recommendations to customer and internal stakeholders.
- Manage a broad Trellix product portfolio in production across 50+ customer environments, including EDR, XDR, endpoint security and migration solutions covering 100,000+ endpoints.
- Drive post-deployment adoption of endpoint and EDR/XDR capabilities through health assessment and policy tuning, bringing customer environments onto supported product versions and closing detection coverage gaps.
- Own technical escalations during and after deployment through to resolution, coordinating directly between customer stakeholders and internal product and support teams.
- Author HLD, LLD, POA, as-built and SOP documentation for every delivered solution, giving customer operations teams a complete handover pack at project close.

TECHNOLOGIES

ePO | Endpoint Security (ENS) | Adaptive Threat Protection | EDR / XDR | DLP | Endpoint & Drive Encryption | Application Control | Change Control | Integrity Monitoring | Sandboxing | Threat Intelligence

Senior Enterprise Security Engineer

Mar 2020 – Nov 2020

Pegasus Infotech — Mumbai, India

Engaged as a third-party security engineer on McAfee product engagements, delivering endpoint protection, detection and data protection solutions in customer environments.

- Delivered McAfee endpoint security, EDR and DLP implementations in customer environments as a third-party engineer.
- Planned, designed and deployed security products, including configuration and policy definition, with LLD, HLD, as-built and SOP documentation.
- Performed risk management and product assessment activity.

Senior Executive – Infrastructure Security

Mar 2016 – Feb 2020

Essen Vision Software Pvt Ltd — Mumbai, India

Delivered enterprise security implementations for customers of a security services provider, owning projects from scope definition through design, deployment, documentation and operational handover.

- Prepared scope of work and project plans, and authored low-level design documentation for customer security engagements.
- Implemented security solutions end to end — installation, configuration, third-party application integration, dashboard build and alert/report configuration — carrying each engagement from design sign-off through to production cutover.
- Educated onsite teams to operate and manage deployed security products, and prepared as-built and scope-of-procedure documentation for operations teams.
- Ran proof of concept (POC) engagements for McAfee, Trend Micro and IBM products, and performed risk management and product assessment.
- Closed every deployment with as-built documentation, SOP handover and onsite team enablement, leaving customer operations teams able to run the product without ongoing vendor dependency.

TECHNOLOGIES

McAfee ePO | McAfee ATP / EDR / DLP / MOVE | Trend Micro Anti-APT | Trend Micro Deep Security Manager | TippingPoint IPS | Sophos Intercept X Advanced

Early Career

IBOX SOLUTIONS, MUMBAI Technical Support Executive — 2015 – 2016 — Technical support for deployed IT security solutions in customer environments, covering incident troubleshooting, escalation and resolution.
